RANJAN YADAV

FULL STACK WEB DEVELOPER

PROFILE

Results-driven MERN Stack Developer with 2+ years of experience in building and deploying scalable, high-performance web applications. Skilled in creating RESTful APIs, working with React.js/Next.js, and deploying on AWS. Successfully delivered 4+ production projects with a strong focus on performance, security, and usability, while contributing effectively in agile teams.

WORK EXPERIENCE

- **Areness Law (Gurgaon)** JAN- 2025 - NOV - 2025
Associate Software Developer
 - Worked on the development of a Case Management System that improved document handling efficiency for legal teams.
 - Engineered role-based authentication and real-time data tracking, enabling seamless collaboration across departments.
 - Deployed and maintained production systems using AWS EC2 and S3.
 - Integrated REST APIs with advanced routing and middleware using Express.js and Node.js, improving overall API performance.
- **Get Now Solution Pvt Ltd (Delhi)** SEP - 2024 - DEC - 2024
Full Stack Developer
 - Developed and maintained the Omega Travel web application using React.js and Node.js, ensuring a seamless booking experience for users.
 - Integrated the Amadeus API to enable real-time flight search and booking functionality.
 - Designed and implemented a secure user authentication system using JSON Web Tokens (JWT) and bcrypt.
 - Leveraged Redux for state management to ensure efficient handling of application data and user interactions.
- **Nolan Edutech Private Limited** NOV - 2023 - MAY - 2024
SDE Intern
 - Developed a face-recognition web application using React.js and Tailwind CSS.
 - Collaborated with a team of data analysts and backend developers to integrate facial recognition technology into the application.
 - Implemented user authentication and authorization features using React Router and JSON Web Tokens (JWT).
 - Utilized state management libraries such as Redux for managing complex application states and data flow.
- **Projects**
- 1. Durgauli**  
Next.js | MongoDB | Node.js | Redux | TailwindCSS | RESTful APIs
 - Built a responsive website using Next.js and Tailwind CSS to enhance communication and coordination within the Durga Puja organizing team
 - Implemented Admin Login Page and User Dashboard Page using Redux to manage user authentication and display relevant content
 - Created Admin Dashboard Page and Contact Page to streamline the efforts of the organizing team
